

NOV. 20 IS COMING: Are Your Chemical Labels Ready?

TIP: Chemical mixtures have their own separate timeline. Don't mix them up!

HAZCOM DEADLINE: NOV. 20, 2026!

Do your employees work with chemicals? Cleaners, solvents, sprays, gases?

OSHA revised its Hazard Communication Standard (HazCom). By **Nov. 20, 2026**, covered employers need to update:

- Chemical labels
- Written hazard communication programs
- Employee training

And HazCom is one of OSHA's most heavily enforced rules. It shows up on the most-cited list again and again.

DON'T MISS IT: LEARN MORE From OSHA

WHAT'S CHANGING

1. **New hazard classifications and definitions.** This includes updated criteria for skin and eye hazards.
2. **Downstream uses.** Classifications now consider certain reasonably anticipated uses, not just the intended one.
3. **Small container labels.** New labeling rules for containers under 100 milliliters.

4. **Confidential business information.** Some chemical concentration info can be withheld if the rules are met.
5. **Compressed gases and aerosols.** New requirements for pressurized chemicals and certain spray products.

Want the full rules? Go straight to the source.

DID YOU KNOW?

OSHA expects your labels, your written program, and your training to match the revised rule by Nov. 20.

Do you have updated labels on your chemicals? Is your written HazCom program current? Has your team been trained on the new hazards? Do you have an up-to-date chemical inventory list and SDS?

If not, ask us. We offer Hazard Communication (GHS)/SDS training, Hazardous Chemical Inventory List, SDS and Labeling support, and written program development. In Spanish and English. We can help.

DO THIS TODAY

Pull out your SDS binder. Are the sheets current?

Not sure?

Email Us TODAY Hazard Communication (GHS)/SDS training, Hazardous Chemical Inventory List, SDS and Labeling support, and written program development. In Spanish and English
